Aims and Scope

Integrated Computer-Aided Engineering was founded in 1993. "Based on the premise that interdisciplinary thinking and synergistic collaboration of disciplines can solve complex problems, open new frontiers, and lead to true innovations and breakthroughs, the cornerstone of industrial competitiveness and advancement of the society" as noted in the inaugural issue of the journal. The focus of ICAE is the integration of leading edge and emerging computer and information technologies for innovative solution of engineering problems. The journal fosters interdisciplinary research and presents a unique forum for innovative computer-aided engineering. It also publishes novel industrial applications of CAE, thus helping to bring new computational paradigms from research labs and classrooms to reality. Areas covered by the journal include (but not limited to) artificial intelligence, advanced signal processing, biologically inspired computing, cognitive modeling, concurrent engineering, database management, distributed computing, evolutionary computing, fuzzy logic, genetic algorithms, geometric modeling, intelligent and adaptive systems, internet-based technologies, knowledge discovery and engineering, machine learning, mechatronics, mobile computing, multimedia technologies, networking, neural network computing, object-oriented systems, optimization and search, parallel processing, robotics virtual reality, and visualization techniques. The primary focus of the journal is novel computational modeling. Papers describing software development projects are not suitable. Papers integrating multiple fields in a novel way are particularly welcome.

Call for Papers

Please email to the Editor-in-Chief

1) A statement that this manuscript is your "original unpublished work and the manuscript or any variation of it has not been submitted to another publication previously."
2) The pdf and Word files of your paper prepared according to the journal template (available on the journal web site). 3) The names, affiliations, and full contact information including email addresses of six to ten (preferably ten) leading researchers who have published in the subject area of the paper outside your country. (They should not be your advisor, advisee, research sponsor, or research collaborator. They can include senior researchers cited in your paper.). 4) Conscientious Reviewer form for each author (except students) is available on the journal web site.
